

**MTH5103 COMPLEX VARIABLES  
MID-TERM TEST***Date: 23 February 2012 Time: 10.10–10.50***Complete the following information:**

<b>Name</b>	
<b>Student Number (9 digit code)</b>	

The test has FOUR questions. You should attempt ALL questions. Write your calculations and answers in the space provided. Cross out any work you do not wish marked. Calculators are NOT allowed.

<b>Question</b>	<b>Marks</b>
<b>A</b>	
<b>B</b>	
<b>C</b>	
<b>D</b>	
<b>Total Marks</b>	

**Question A.** [20 marks]

Let  $z_1 = -1 + 5i$  and  $z_2 = 2e^{3i\pi/4}$ . Compute:

(a)  $\text{Im}(z_2)$ , [4 marks]

(b)  $|z_1|$ , [4 marks]

(c)  $|z_1 + z_2|$ , [6 marks]

(d)  $z_1^{-1}$ . [6 marks]

There is no need to evaluate radicals. Present your result in the standard form  $z = x + iy$  in (d).

---

**Answer A.**

**Answer A.** (*Continued*)

**Question B.** [35 marks]

- (a) Find all complex solutions of  $z^4 = -16i$ , giving the results in polar form and indicating their location in the Argand diagram. [15 marks]
- (b) Derive the curve corresponding to

$$|z + 2i| + |z - 2i| = 6$$

[20 marks]

and describe this geometrically.

---

**Answer B.**

**Answer B.** (*Continued*)

**Question C.** [25 marks]

(a) Evaluate the limit

$$\lim_{z \rightarrow i/2} \frac{(2z - 3)(4z + i)}{(iz - 1)^2}.$$

[10 marks]

(b) Starting from the definition of the derivative of a complex function as a limit, find the derivative of

$$f(z) = 1/z^2$$

for  $z \in \mathbb{C}$  and state where  $f(z)$  is holomorphic.

[15 marks]

---

**Answer C.**

**Answer C.** (*Continued*)

**Question D.** [20 marks]

- (a) Let  $f(z) = u + iv$ , where  $z = x + iy$ . Write down the *Cauchy-Riemann* equations relating  $u$  and  $v$ . What other conditions are required for  $f(z)$  to be differentiable at  $z$ ? [10 marks]
- (b) Use the *Cauchy-Riemann* equations to find the values of  $z$  for which

$$f(z) = x^2 + iy^3$$

is differentiable.

[10 marks]

---

**Answer D.**

**Answer D.** (*Continued*)
